- Site Construction
- Quality Control
- Land Balancing
- Erosion Control

- Site Restoration
- Commercial Trucking
- Project Scheduling
- Risk Management

PROFESSIONAL EXPERIENCE

DiPonio and Morelli Construction Inc., - Milford, MI

2008-Present

SITE SUPERVISOR / HEAVY EQUIPMENT OPERATOR

Site Construction Company specializing in underground utilities and general contracting. Supervised grading, land balancing, and site restoration operations. Responsible for soil erosion control, equipment mobilization, and third party vendor schedules. Maintained daily job reports, material delivery logistics, budget and scheduling. Supplemented heavy equipment requirements, operating dozers, excavators, loaders, and driving tractor-trailers.

- Maintained sites within full OSHA compliance
- Flawless safety record, free of on the job injuries
- Operated in highly sensitive environmental locations while maintaining full EPA/DEQ compliance

Stante Excavating Inc. - Salem, MI

2007-2008

HEAVY EQUIPMENT OPERATOR / CDL DRIVER

Underground Utility General Contractor specializing in deep/wet trench excavation & utility installation.

Engaged for my ability to operate full range of excavation equipment as a back-up operator for absentee employees. Also, drove tractor-trailer, moving heavy equipment between construction sites. Loaded, secured and unloaded heavy equipment, materials, and supplies at various job sites. Worked independently with minimal supervision, maintaining material inventory, equipment tracking, and provided routine equipment maintenance and repairs.

H & L's Venture Construction Inc., White Lake, MI

1986-2007

OPERATION MANAGER / PROJECT MANAGER

Site Construction Company focused on mass earth excavation and underground utility installation. Coordinated field activities including pre-construction, verifications and measurements. Oversaw and reviewed sub-contractors performance and quality of construction. Insured specification compliance and material specifications. Managed project schedules and insured timely completion of deliverables. Coordinated with state and local inspectors for reviews and permits. Assisted with cost estimates for material and sub-contractors bids on all projects.

- Maintained zero infractions with OSHA inspections
- Provided value engineering for clients projects
- Maintained construction sites free of environmental infractions
